

Fall Protection **Solutions** By Design

TRITECH FALL PROTECTION IS YOUR PARTNER IN SAFETY

Since our first system installation in 1993, Tritech Fall Protection has engineered, designed, supplied, installed, and certified thousands of fall protection systems across North America. Over the years, the Tritech name has become a pillar of strength in the evolving world of workplace safety.

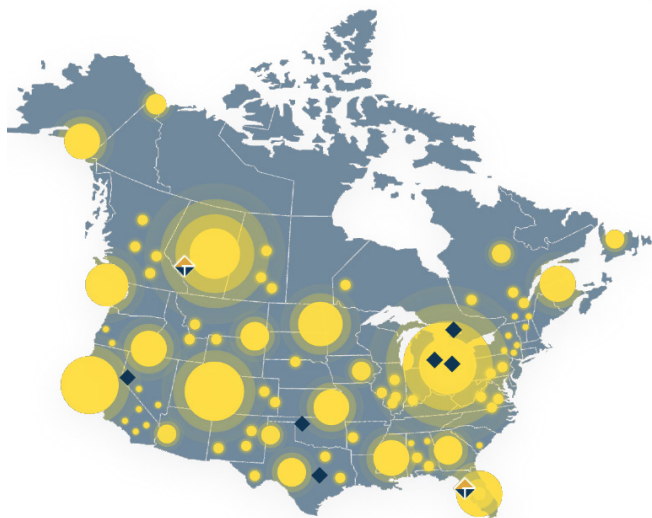

With headquarters in Orlando, Florida, and Calgary, Alberta, our strategic locations allow us to efficiently serve the North American market coast to coast. As active members of both the ANSI and CSA boards, we stay ahead of industry regulations, ensuring our systems comply with the latest safety standards.

Innovation & Commitment to Safety

Tritech Fall Protection is dedicated to procuring and integrating new technologies to improve workplace safety. Every system we design meets or exceeds Occupational Health & Safety (OHS) standards, delivering advanced and cost-effective solutions to prevent workplace accidents and injuries.

Partnership in Safety

Our Partnership in Safety Program allows customers to be actively involved in the early planning stages, collaborating with our engineering and design team to develop tailored solutions.

◆ **HQ:** Orlando, FL and Calgary, AB.

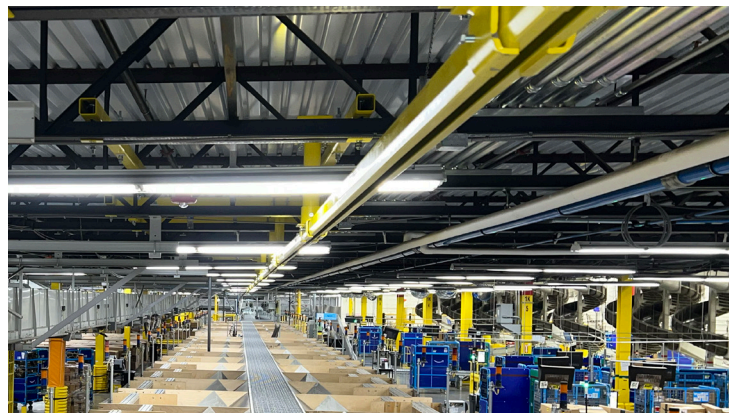

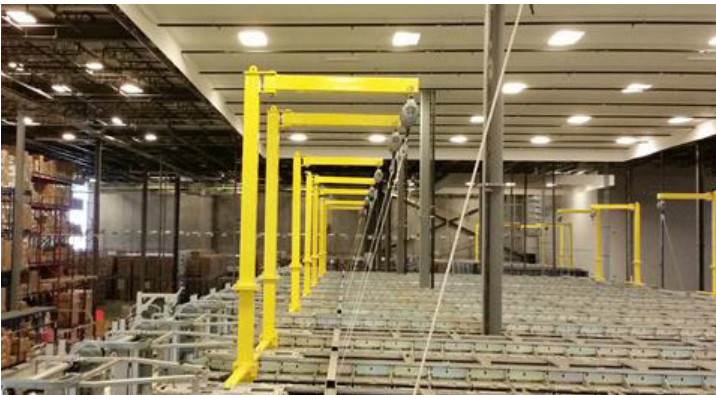

◆ **Sales Offices:** Cleveland, Pittsburgh, San Antonio, Houston, Oklahoma City, Las Vegas, Toronto and Phoenix.

● **Tritech** install locations across North America.

Fall Protection that's *Code-Compliant* and *Custom-Engineered*.

Every hazard is different, so why would every solution be the same?

Trusted Across North America for Engineered Safety

Applications and Industries Served by Tritech

Agriculture

Confined Space
Suspended Access
Ladders
Machinery Safeguarding
Processing Areas
Mining

Building Access and Maintenance

Exterior Ladders
Roof Access
Exterior Wall and Facades
Window Washing
Solar Equipment

Confined Space Entry

Tanks
Silos
Pits
Elevator Shafts

Education

Roof Access
ADA Guardrail
Maintenance Access
Window Washing

Energy and Utilities

Utility Poles
Communication Towers
Structures
Renewable Energy
Power Transmission and Substations
